Attachments: 03-27-14 Docket Submission E0000C-11-0328 to Correct Texas PUC Report by Rivaldo.pdf

Dear Commissioner Burns, ACC Executive Director Jodi Jerich and Policy Advisor Tom Galvin:

Thank you again for meeting with our group yesterday and thank you for the opportunity to have such an important discussion.

We are enclosing:

1. As promised, here is the link for Dr. Karl Maret's half hour presentation. This presentation will help you understand the potential biological and adverse health effects from radiofrequency radiation emitted by "smart meters." Dr. Maret is an engineer, physician and former researcher in the Canadian Armed Forces and expert in electromagnetic fields. As for the question if the medical doctor part of him can relate to the engineer part of him, well it's worth listening just to find out for yourself.

<http://vimeo.com/87023780>

2. Here are his PowerPoint slides from his presentation. Would you put the PowerPoint slides onto the Dockets for us?

<http://skyvisionsolutions.files.wordpress.com/2014/03/maret-presentation-january-2014.pdf>

3. Attached Memorandum to Submit to the Docket No. E00000C-11-0328 regarding the withdrawal of the Texas PUC's Project No. 40190, Project Relating to Advanced Metering Issues (2012) by Lt. Governor David Dewhurst.

This Report had been submitted to the same docket on 06/28/13 number 0000145981 by Steven M. Olea, Director, Utilities Division.

We are in the process of gathering the questions we have for APS, should have them ready by next week. Thank you for your offering to set up a meeting with APS for us.

Sincerely,

Monnie Ramsell

Dear Patriot Shar,

Since the December 2012 issuance of a report on the health effects of smart meters by the Public Utilities Commission of Texas, many individuals have contacted our office raising concerns about the methodology used in the study of studies. In light of these communications, we have asked for the State to again look into these health concerns. It has also been brought to our attention that the report is being relied upon by administrative bodies across the United States and Canada. We encourage all such administrative bodies to conduct independent research to ensure that health concerns are fully addressed.

Sincerely,

David Dewhurst
Lieutenant Governor
